11.1 Formulae and functional groups

Hard 1 / Original practice worksheet

Name: _____ Date: _____

1 An open-chain hydrocarbon has the formula C5H10 and contains one carbon-carbon double bond. Identify its homologous series and justify your answer.

(Total for question 1 is 2 marks)

2 Draw the displayed formula of ethanoic acid, CH3COOH. Identify the carboxyl group.

(Total for question 2 is 3 marks)

11.1 Formulae and functional groups

Hard 1 / Original practice worksheet

Name: _____ Date: _____

3 Explain why the O-H bond in ethanoic acid does not mean the compound is classified as an alcohol.

(Total for question 3 is 2 marks)

4 Two compounds have the molecular formula C4H10. Explain how this is possible.

(Total for question 4 is 2 marks)
