CHEMISTRY / IGCSE

11.1 Formulae and functional groups

Medium 2 / Original practice worksheet

Name: _____ Date: _____

1 Give the general formula of an alkene with one carbon-carbon double bond.

(Total for question 1 is 1 mark)

2 A compound has the formula C4H9OH. Identify its homologous series and functional group.

(Total for question 2 is 2 marks)

11.1 Formulae and functional groups

Medium 2 / Original practice worksheet

Name: _____ Date: _____

3 Explain why members of the same homologous series have similar chemical properties.

(Total for question 3 is 2 marks)

4 Describe the difference between a molecular formula and a displayed formula.

(Total for question 4 is 2 marks)
